

Your doctor is collecting a lot of information that will be used to come up with a suggested treatment plan—and you don't want to be left out of the loop. Ask your doctor to help you fill out this worksheet (note that not every test may have been done). It will help you better understand your cancer—and be better prepared to make important decisions.

Pathology Report	What was tested/calculated	The result	What does this mean?
	TNM score		
	Breast cancer stage		
	Tumor grade		
	Hormone receptor status		
	HER2 status		
	Lymph node involvement		
	OncotypeDX™		

Encourage your surgeon to draw on these diagrams to explain the size and location of your tumor and how the cancer may spread.
